

MODERE CELLPROOF BODY FIRMING FOAM

Personal Care | Skin

How does CellProof Body Firming Foam work?

- CellProof Body Firming Foam will help smooth the appearance of skin with moisturization. Proper massage and application of the product aids this effect. CellProof Body Firming Foam provides a hydrated, more firm and healthy look to the skin.

What is the best method to apply CellProof Body Firming Foam?

- Use as directed on the bottle. The best way to apply this targeted full body product is by using a circular motion to massage into the skin. Apply from the ankles up, toward the heart.

Can I use CellProof Body Firming Foam on my face?

- CellProof Body Firming Foam is specifically designed for the body. It may be used on the neck, but Modere recommends face-specific products such as CellProof Serum and Moisturizer to complete your personal care routine. The CellProof Serum and Moisturizer will visibly tighten and moisturize the appearance of facial skin, as well as the neck, décolleté and backs of hands.

Why does my skin feel cooler when I apply CellProof Body Firming Foam?

- One of the ingredients in CellProof Body Firming Foam is peppermint oil, which is an aromatic herb in the mint family. When applied topically this may create a mild cooling sensation on the skin.

In what order should I apply CellProof Body Firming Foam in relation to my other body products?

- CellProof Body Firming Foam should be applied to clean, dry skin prior to any additional moisturizer.

What does CellProof Body Firming Foam smell like?

- CellProof Body Firming Foam provides aromatic notes of coconut and fresh berries.

How long before I see results?

- Individual results will vary, but you will see more hydrated and healthy-looking skin after the very first application. For best results combine CellProof Body Firming Foam with a healthy lifestyle such as the Modere SHAPE Body Transformation System and/or the Liquid BioCell product of your choice.

How long will my bottle of CellProof Body Firming Foam last?

- Depending on product usage, one bottle should last approximately one month. This timeline may vary depending on application amount per area and how many areas of the body you are targeting.

Where should I apply CellProof Body Firming Foam?

- CellProof Body Firming Foam is best applied to high adipose areas such as thighs, buttocks, flanks, abdomen, upper arms and neck.

Are my results enhanced if I dry brush prior to CellProof Body Firming Foam application?

- CellProof Body Firming Foam is best applied to high adipose areas such as thighs, buttocks, flanks, abdomen, upper arms and neck.

Should I use CellProof Body Firming Foam with a wrap?

- There is no need to wrap the body or areas of application for results.

Is CellProof Body Firming Foam gluten-free?

- Yes, CellProof Body Firming Foam is gluten-free.

Do I need an additional body moisturiser if I use CellProof Body Firming Foam?

- It's not necessary, but depending on your skin's moisture content you may wish to apply an additional body moisturizer such as Modere Body Butter or Modere Hand and Body Lotion over your CellProof Body Firming Foam.
